

DEPARTMENT OF THE NAVY
OFFICE OF THE SECRETARY
WASHINGTON, D. C. 20350

SECNAV INSTRUCTION 11011.40A

From: Secretary of the Navy
To: Distribution List

Subj: Inventory of Military Real Property

Encl: (1) DOD Instruction 4165.14 of 21 Dec 1966 with change 1
incorporated

1. Purpose. To reassign responsibilities for policy, administration, and maintenance of the inventory of real property within the Department of the Navy.

2. Cancellation. SECNAV Instruction 11011.40 of 25 April 1967 is cancelled and superseded by this Instruction.

3. Responsibilities. Enclosure (1) promulgated Department of Defense procedures for the establishment and maintenance of an inventory of real property, and for the preparation of an abridged inventory in summary form for use by interested offices of the Department of Defense and Congress. Responsibilities for policy, administration and maintenance of the inventory are assigned as follows:

a. Responsibility for establishment of Department of the Navy policy and procedures for the real property inventory including implementation of the procedures in enclosure (1) and for administration of the program within the Department of the Navy is assigned to the Chief of Naval Operations except as noted in the following paragraphs.

b. Responsibility for financial policy, development of financial procedures and reports, and audit of records and reports for real property inventory within the Department of the Navy is assigned to the Comptroller of the Navy.

* c. The Commandant of the Marine Corps is responsible for assisting in the formulation of policies and procedures for the real property inventory and for administration of the inventory within the Marine Corps. Administration of the inventory will be in accordance with guidelines established for the Department of the Navy.

 - (h) DoD Instruction 7500.2, "Accounting for Military Real Property in the Department of Defense," October 20, 1966

I. PURPOSE

This Instruction provides uniform procedures for (1) the establishment and maintenance of an inventory of real property (land and rights therein; buildings; and all other), and (2) the preparation of an abridged inventory in summary form for use by interested offices of the Department of Defense and Congress.

II. APPLICABILITY AND SCOPE

This Instruction is applicable to Department of Defense Components, and covers all real property except:

- A. Property in an officially designated combat zone, and river and harbor and flood control property under the jurisdiction of the Army.
- B. Property in the National Industrial Reserve, and property disposed of subject to right of recapture, or National Security Clause, unless such property is under military control.
- C. Property furnished by the General Services Administration.

III. INVENTORY AND INVENTORY SUMMARY DATA

The Inventory is to be a basic source of information for reports of status, cost, capacity, condition, use, maintenance and management of the real property over-all and of the real property of individual

installations of the military departments. The Inventory Summary is to be a reference and a source of current comparable information pertaining to such real property for use in developing and effectuating Department of Defense policies, plans and programs. The Inventory will be established and maintained and the Inventory Summary will be reported in accordance with Enclosure 1, "Instructions."

IV. SCHEDULE OF MAINTAINING AND REPORTING THE INVENTORY

- A. Each of the military departments will maintain the inventory in an office of record at its Washington, D. C. headquarters where it will be available for reference to the Staff elements of the military departments and of the Office of the Secretary of Defense. Changes in the inventory at the installation level will be reported to the office of record of the applicable military department. Data will be maintained on a current basis and must be current as a minimum as of the end of each calendar and fiscal year.
- B. Summary reports will be prepared on an annual basis. Revisions in the inventory will be reflected in subsequent issues of the Inventory Summary, which will be prepared and distributed within 90 days after 30 June of each year. The Inventory Summary will be prepared and furnished by each military department. The Department of the Navy will be responsible for reporting Marine Corps facilities. The military department having real property accountability for a joint installation or leased facility will be responsible for submitting the Inventory Summary of such installation or leased facility.
- C. Copies of the Inventory Summary prepared by each military department will be furnished the Secretary of Defense, the Secretaries of the other military departments, and such other distribution as may be required. Data from these Summaries and from those prescribed by reference (g) will be used to satisfy the requirement for reporting to the Congress under 10 USC 2701 (reference (d)).
- D. In addition, inventory data relative to installations located in the Continental United States (48 contiguous States and the District of Columbia) prepared in accordance with reference (f) will be furnished direct to the General Services Administration, with a courtesy copy to the OASD (Comp) Directorate for Statistical Services.

V. PROPERTY ACCOUNTING

The inventory of real property to be maintained by the military departments in accordance with this Instruction will accomplish requirements of 10 USC 2701 pertaining to the existence of property accounting records for real property.

VI. REPORT CONTROL SYMBOL

The Inventory Summary requirement contained herein has been assigned Report Control Symbol DD-I&L(A)760.

VII. GENERAL

* Questions of interpretation or applicability of this Instruction
* will be addressed to the Office of the Assistant Secretary of
* Defense (Comptroller), Directorate for Management Information Operations *
* and Control, for maintaining and reporting aspects of the inventory; *
* to the Directorate for Accounting Policy on accounting and pricing *
* of real property; and to the Office of the Assistant Secretary of *
* Defense (Manpower, Reserve Affairs, and Logistics), Directorate for *
* Real Property, for policy aspects concerning real estate. The first *
* report due in accordance with this Instruction reflecting the *
* change in the Federal Government's fiscal year will be as of *
* September 30, 1977 and will be due December 31, 1977. *

VIII. IMPLEMENTING INSTRUCTIONS

* Existing military department implementing instructions will be re-
* vised to reflect the changes herein, and submitted simultaneously *
* to the Assistant Secretary of Defense (Manpower, Reserve Affairs, *
* and Logistics) and the Assistant Secretary of Defense (Comptroller) *
* within sixty (60) days for approval prior to publication. Retro-
active changes to existing records will not be required.

IX. CANCELLATION

Reference (a) and Report Control Symbol DD-P&I(A)326 are cancelled.

X. EFFECTIVE DATE

This Instruction is effective immediately.

Assistant Secretary of Defense
(Comptroller)

Assistant Secretary of Defense
(Installations and Logistics)

Enclosure - 1
Instructions

INSTRUCTIONS

I. PURPOSE

These instructions provide detailed information and guidance relative to the real property inventory and Inventory Summary. Section III of this Inclosure covers the establishment and maintenance of real property inventory records "Basic Individual Records." Section IV "Reporting - Inventory Summary, etc." covers reporting Inventory Summary data as derived from the Inventory (Basic Records) covered in Section III.

Existing records should be utilized as much as possible; however, such records must be accurate. Any additional information required by the military department concerned may be included in the basic inventory records.

II. DEFINITIONS - The following definitions are furnished for guidance only, and their use is to be limited to implementation of this Instruction:

- A. Activity. A unit, organization, or installation performing a function or mission, e.g., reception center, redistribution center, naval station, naval shipyard.
- B. Base. An area or locality containing installations which provide logistic or other support.
- C. Building Construction, Permanent. A building suitable and appropriate to serve a specific purpose for a maximum period of time (at least 25 years) and with a minimum of maintenance.
- D. Building Construction, Semipermanent. A building suitable and appropriate to serve a specific purpose for a limited period of

time (less than 25 years and more than 5 years) and with a moderate to high degree of maintenance.

- E. Building Construction, Temporary. A building suitable and appropriate to fill a need for a short period of time (five years or less) without regard to degree of maintenance, and the designs and details of which provided minimum facilities with maximum initial economies.
- F. Building, Portable. A building designed for the continuing purpose of being moved easily from one location to another usually for a short length of time in one location, such as shelters for workmen, construction offices, unconnected sanitary facilities, self-contained office and night watchman trailers, and movable tool sheds.
- G. Building, Relocatable. Buildings, including trailers, which serve the same general function of permanent, semipermanent, or temporary buildings usually for a considerable length of time in one location but are designed to facilitate economical movement to the site and from one site to another such as temporary classroom, office, or storage buildings.
- H. Condition, Nonusable (N). The condition of a facility which is unserviceable because it has deteriorated to the extent that it needs extensive restoration, or constitutes a danger to health and safety of personnel or equipment.
- I. Condition, Usable (U). The condition of a facility which indicates it is serviceable for a useful purpose.

- J. Facility, Industrial. Property, other than materiel and special tooling, of use for the performance of a contract or subcontract or order, including real property and rights therein, buildings, structures, improvements, and plant equipment.
- K. Facility, Real Property. A separate individual building, structure, or other real property improvement. (Each item which is subject to separate reporting under the Department of Defense real property inventory.)
- L. Gross Floor Area (sq.ft.). The total area of all the floors extended to the normal outside face of the building wall including basements but excluding unusable attic space.
- M. Installation. An installation is a post, camp, station, hospital, depot, arsenal, etc., comprising land, buildings, structures, and utilities constructed or acquired for the operation and support of the installation mission. Activities that for economy or other reasons are located within the confines of another installation and occupying portions of the land, buildings, and structures of the main installation are considered to be tenants.
- N. Installed Personal Property (Installed Building Equipment) Those items of accessory equipment and furnishings, including materials for installation thereof, which are required for operation and affixed as a part of the building or facility such as: fixed overhead crane-runways; elevators; lavatories; plumbing, heating, ventilating, cooling, electrical and sprinkler systems; communications systems less

hand sets; hotwater heaters; garbage disposals; and built-in furniture and window-type air conditioning units installed in such a manner that removal would require reconstruction of the realty. Plant and production equipment will not be included.

- O. Space Volume (cu.ft.). The actual cubic space inclosed within the inner surfaces of the outside or inclosing walls and contained between the inner surfaces of the structural members (roof, trusses, rafters, or ceiling, whichever is lower) and the finished surfaces of the lowest floors.
- P. Utility Plant. For inventory purposes, a utility plant housed separately from the building or buildings served and producing or providing a usable utility service will be separately inventoried. Equipment furnishing such service as air conditioning, motor generator, etc., physically located in a building and serving only that building will be considered a part of the building and will not be separately inventoried. Personal property and equipment will not be included in the real property records.

III. ESTABLISHING AND MAINTAINING REAL PROPERTY INVENTORY RECORDS (BASIC INDIVIDUAL RECORDS)

General

Each military department will maintain an individual real property record for every item of real property and real property improvement owned, leased, or otherwise acquired and controlled by the military department or DoD agency excluding assigned space in public

buildings accommodations. This will include any property and improvements acquired from other departments and government agencies. DoD agencies may maintain basic record cards as agent for a military department who will report to OSD for them under this Instruction. Property owned by the military departments which is furnished to Defense agencies by use permits will be accounted for and records maintained by the owning military departments. This is in accordance with the provisions of Section 610, PL 87-554(reference e).

The military department having real property accountability for a joint installation or leased facility will be responsible for preparing and maintaining the inventory covering property of such installation or leased facility. The Inventory (Basic Records) will be maintained in a current status and in such form and manner as to reflect the exact location and position of the real property under control of the specific installation or activity.

Each item of property will be sufficiently described on the basic property record to permit proper identification on any plat map for the installation. Each item will also be sufficiently described to permit proper coding by DoD facilities classes and construction category codes as prescribed by reference (b) and Attachments 1 and 2 of this Instruction.

In the case of an installation situated in more than one state, a separate record card and report will be made for the portion of the

installation located in each state. A cross-reference to the installation, name and state, will be made on each separate state record card and report for the specific installation.

When an installation is disestablished, inactivated, or declared excess, the property of the installation will continue to be reported in the inventory under its last official title until such time as it is converted to other use, sold, transferred to another military department or agency, or transferred out of the account of the Department of Defense.

Specific

The basic property records will show for each item complete identifying information including:

- (a) Installation Name - The name of the installation recorded will be the official designation of the installation or base. In those instances where the installation or base is generally known by a well-recognized designation or location for a long time, such designation will be included in parentheses following the official name. An example of this might be Naval Auxiliary Air Station (Saufley Field) or Naval Amphibious Base (Little Creek). The identification number used by the military department will be recorded for the installation. For the purpose of real property inventory, noncontiguous areas except as caused by consolidation or merger of installations, highways, railroads, rivers, bays, etc., shall be considered as separate installations.

Segments of the same functional base even though contiguous operated by different command or administrative units may be treated as separate installations, e.g., shipyards, air stations, storage depots, etc., as long as all property within a designated area is reported at the one location.

- (b) Location of Installation - When the installation is within a city show the name of the city and state. When the installation is not within a city show the name of the county in which the headquarters of the installation is located, and the state. If the installation is contiguous to the city limits it is considered within the city.

Nearest City - Enter "within city" if a city is shown in the block "location of installation." Otherwise, enter the distance in miles and direction from the center of the nearest sizable city or town, i.e., 9 miles southeast of Blufftown (not Blufftown 9 miles northwest). For this entry show the city generally accepted as the location, e.g. Columbus (Georgia) for Fort Benning rather than Fort Benning although the latter is the post office address.

Counties - Enter all counties in which the installation is located.

- (c) Type - This will indicate whether the installation is considered industrial or non-industrial. If the major functions are devoted to production, or industrial-type repair or overhaul, it will

be designated as industrial; any other functions will be designated as non-industrial. In some instances, a complex consists of separate installations, i.e., storage and issue, manufacturing, overhaul, etc.

- (d) Status - This will indicate whether the installation is currently active, inactive, standby, or excess. For an entire installation recorded as excess, the date that the installation was reported excess to GSA will be entered.
- (e) Date Acquired - This date will be the first date of occupancy for military use in the case of installations remaining continuously under military control. If the installation was disposed of by the government and reacquired, the date of such reacquisition will be shown. If the installation was transferred to another government agency and subsequently reacquired by the Department of Defense the date of reacquisition by the DoD will be shown.
- (f) Function - The mission of the installation will be briefly stated. If it is an industrial installation the principal product produced or service rendered should be included; if several products are produced or serviced enter the group category such as small arms cartridge production or fifth echelon repair.
- (g) Contract Operator - In the case of a contractor-operated government-owned industrial facility, enter the name of the contractor currently operating or who last operated the facility.

(h) Inventory Data - The data will be recorded according to the category shown in attachments 1 and 2. In this connection it is important that the building or structure will be recorded according to the use for which built unless it has been converted or has been redesignated for another use on a continuing basis. In the case of a multiple purpose building, significant areas will be recorded according to the major uses (except for short term or ancillary use) but the building count will be recorded under the single built-for, converted, or programmed, category comprising the largest segment. Building area will be considered significant when 5,000 square feet or more.

- (1) Buildings - For each building (including relocatable but excluding portable), the building number assigned by the installation will be recorded. Also, the type of construction (i.e. permanent, semipermanent, or temporary) will be shown. (Data will not be included for buildings which are in the process of construction and are not yet ready for beneficial occupancy. Buildings will be included when beneficially occupied or usably complete, as reported on a preliminary DD Form 1354 (see reference (c))).
- (2) Structures - The identifying number, if such is assigned, will be shown for each structure (including relocatable

but excluding portable). It is important to differentiate buildings from other structures.

- (3) Utility Distribution System - Reference numbers, if such have been assigned, will be shown to identify those portions of the utility distribution system not classified as buildings or structures.

- (4) Land - The number of acres of land under control of the specific installation will be recorded. This will be properly coded in accordance with the category code shown in attachments 1 and 2. It is important to distinguish accurately between lands acquired permanently through withdrawal from the public domain and those withdrawn temporarily from the public domain. The former will be coded 912 and will represent those lands withdrawn from public domain by executive order, public land order, or notation of land records. Public domain lands acquired through license or permit will be included in category 913.

In recording land costs, it is important that only the cost of the acquisition of the land, excluding administrative costs (rights, etc.) incurred, be recorded (the amount paid to the landowner for the land only). Other costs pertinent to readying the land for certain future use such as drainage, levelling and landscaping will be identified and

included where possible with the cost of the facility constructed thereon; otherwise, it is treated as an expense.

- (5) Condition - This will indicate whether the inventory item is usable or nonusable as determined in accordance with the definitions set out in II above.
- (6) Year Built - This item will show the year built.
- (7) Area - This item will show the gross floor area for the real property facility wherever applicable. The unit of measure (acres, square yards, square feet) will be used when necessary (see symbols for units of measure listed in attachments 1 and 2).
- (8) Ownership - This item will show whether the facility is owned, leased, or being used under license, permit, temporary executive order, etc.
 - (a) Facilities in United States, Territories and Possessions - Record and report as owned if title to the facilities is vested in the United States Government; otherwise report as inleased, permit, and so forth.
 - (b) Facilities on Foreign Soil - Record and report as owned if constructed by the United States or if constructed for the United States with surplus commodity transaction funds.
- (9) Units - There will be included the units of measure as applicable for each specific category (see attachment 1). These

will be expressed in terms of number of persons, linear feet, number of family units, gallons, barrels, etc.

- (10) Vacant Area - This will indicate in appropriate units of measure those areas or portions of the gross area which are vacant and for which there is no programmed use within a 12-month period from the updating of the basic record by the controlling military department or DoD agency but will not include those areas or portions which are outgranted to another military department or other governmental or private user.
- (11) Outgranted Area - This will show the area in appropriate units of measure used by other military departments, government agencies, states, or local governments, private enterprise, or individuals.
- (12) Rental Received - This item will record the amount of rental received on an annual basis for the use of any space outgranted (outleased or otherwise). For rent free space the entry will be zero. This item is for reporting purposes and is not to be recorded in the military real property accounts.
- (13) Rental Paid - This will indicate the amount of rental paid on an annual basis for any space which is used by the military department through lease or other transaction executed with an agency or individual outside the specific military

department or DoD agency. For rent free space the entry will be zero. This item is for reporting purposes and is not to be recorded in the military real property accounts.

- (14) Cost of Owned Construction - This will represent the cost of construction to the United States Government, including installed personal equipment, administrative overhead costs, and costs of government-furnished material and labor for properties owned by the U. S. Government (see reference (h)). If the cost was not incurred by the controlling installation, it will be obtained from the appropriate department or Government agency and recorded unless the specific facility was acquired for military use by lease, license, permit, temporary executive order, temporary public land order, or temporary territorial order. Costs will be estimated if actual costs cannot be determined. The cost record will be maintained in a manner that will make it possible to show cost of Government improvements for complete facilities constructed by the Government on leased land.

Property constructed in a foreign country by a military department will be reported as owned property of the military department until such time as its use is no longer required and it is abandoned or disposed of pursuant to the agreement with the foreign country in which such property is located. The cost of such construction will be included in the

inventory as Government-owned property during the period it is under the control of a military department, notwithstanding that in certain foreign countries title of such construction may pass at the time of construction as completed, or at such time as the property is no longer required for military use by U. S. Forces.

Costs will be reported for all facilities constructed from foreign currencies made available through surplus commodity transactions. Costs will not be reported for facilities constructed for NATO, SEATO, or related international type organizations financed from joint allied defense funds and reparations funds or for foreign owned properties made available at no cost to the United States.

- (15) Estimated Value - For non-Government owned facilities (leased or used on a license, permit, or agreement with a foreign government) the estimated value of such facility will be recorded. This is particularly necessary for housing or other properties acquired in foreign countries. Repair or alteration improvements placed on properties held on a license or permit basis by the U. S. Government will not be costed as other items of capital improvement; only the estimated value

of the facility will be recorded. The estimated value for donated land or other properties will be recorded but this estimated value will not be included as a cost to the United States Government.

- (16) Location Maps or Plats - Maps or plats identifying all areas, buildings and facilities, will be maintained as a part of the inventory records for the installation. The maps or plats will be of a type and character that will permit reproduction by printing or photographing. These plats or maps will be reviewed and updated on a yearly basis.

(17) Abandonments in Place

a. Real property records will be reduced by the real property that is abandoned in place or condemned.

b. Regulations published by each military department will prescribe authority for condemnation or abandonment in place of real property. These regulations will provide for satisfactory evidence of one of the following situations as a prerequisite:

- (1) The facility has been rendered unusable by new construction and the cost of removal would exceed the salvage value.
- (2) The facility has been rendered unusable by deterioration to the extent that it will not be repaired or rehabilitated.

- (3) The facility has become unusable because it constitutes a hazard to the health and safety of personnel which is not rectifiable by a reasonable expenditure of funds.

(18) Noninstallation Property - Data will be recorded on a memorandum basis for reporting purposes and not included in the real property accounts for each leased facility which is not all or an accountable part of an installation (exclude assigned space in public buildings or facilities owned or controlled by an agency outside the Department of Defense). Data recorded for these noninstallation properties will show the using organization within the military department, the contract number, the location, the type of space, the area or other measure, and the annual rental paid.

IV. REPORTING - INVENTORY SUMMARY, Etc.

General

The summary volumes covering the inventory, which are to be submitted annually, will be prepared in sufficiently legible print to prevent possibility of misreading of data therein. This is necessary because innumerable and continuing references are made to the volumes by many offices. It is desirable that the Summary be of a uniform size, preferably 8" x 10-1/2". Although not mandatory, the overseas portion may be included in a separate volume. The appropriate security classification will be used for each page and volume in its entirety.

The pages of each section of the Inventory Summary will be consecutively numbered, printed on both sides, and fastened in an appropriate manner. The covers used for binding will be of a stiff hard-back material of sufficient strength to permit stowing on edge within file cabinets.

Specific

(a) Sections - The Inventory Summary will consist of four (4) sections:

(1) Index, (2) Consolidated Categories Summaries, (3) Individual Installation Summary, (4) Summary of Leases. In addition there will be a sheet showing the key to codes and abbreviations, and a table of contents.

(b) Color Scheme - The printing of the Inventory Summary will be as follows:

- (1) Preface printed on yellow paper.
- (2) Table of Contents printed on yellow paper.
- (3) Section I, Index, printed on yellow paper.
- (4) Section II, Consolidated Categories Summaries, printed on green paper.
- (5) Section III, Individual Installation Summary, printed on white paper.
- (6) Section IV, Summary of leases, printed on pink paper.
- (7) Key Codes and Abbreviations printed on white paper.

(c) Section I - Section I, Index, will have three Indexes prepared in accordance with attachment 3, "Alphabetical Index" of all installations in the United States, possessions, and foreign countries

separately; attachment 4, "Alphabetical Geographic Index" of installations in each State, the District of Columbia, possessions, and foreign countries arranged in sequence of States, possessions, and foreign countries; and attachment 5, "Alphabetical Industrial Index by Status" of industrial installations in the United States, possessions and foreign countries. The index covering industrial installations will be arranged in sequence of active, standby, and excess and within the active, standby, and excess according to Government operated and contractor operated. There may be a fourth index by military command or bureau if considered necessary by the military departments.

- (d) Section II - Section II, the Consolidated Categories Summaries will contain the tabulations required in attachment 6. Data required for each category (as shown in attachment 1) in the tabulations prepared in accordance with attachment 7 will include type of ownership (owned, inleased, license, etc., from other than a military department, and permit from another military department), by type of construction (permanent, semipermanent, and temporary). For items (4) through (12) of attachment 6, category tabulations are required only by geographic totals. Tabulations by the segments in (4) through (12) of attachment 6 for individual state, possession, and foreign country will be one-line totals prepared on attachment 8 (for these, there is no shred-out by category).

- (e) Totals - Totals will be shown for all appropriate columns as indicated on the various attachments.

If there is property held under permit from another military department, a memorandum entry of the number of buildings and square feet therein, and the acres will be included on attachment 7. This will eliminate duplication within DoD totals.

Installation Count

The total number of installations by type will be reported on attachment 9; a separate attachment 9 will be prepared for each major geographic area, i.e., U. S., Possessions, and Foreign Countries. Multiple count installations will be shown as a memorandum on attachment 9 as indicated by footnote (c).

- (f) Inventory Changes - Section II of the inventory volumes will contain a tabulation of real estate acquisitions and disposals which have taken place during the fiscal year within each of the major geographic areas (i.e., United States, possessions, and foreign countries). These net changes will be recorded by the state or country (foreign or possession, as applicable) in the respective geographic groupings. This tabulation will be prepared in accordance with attachment 10 to show not only the net change but the actual gross acquisitions, gross disposals, and inventory adjustments (net) occurring during the current fiscal year being reported. Data for the "improvements" line will cover all property except land. Data on additions and alterations to facilities, whenever such are appropriately

capitalized, will be included as "acquisitions." Data in the "inventory adjustments" columns (9 and 10 of attachment 10) will cover only corrections.

- (g) Section III - Section III, the Individual Installation Summary for each installation, will be prepared in accordance with attachment 11. Installation summary sheets will be arranged in alphabetical order within each state for the United States, each possession, and each foreign country.

(1) Line Item Detail - A separate line of data will be shown for each category included in attachment 1 by type of ownership (owned, inleas, license from other than a military department, and permit from another military department) for each type of construction (permanent, semipermanent, or temporary).

(2) Totals - Totals will be shown for the appropriate columns of attachment 11 (the same as required on attachment 7).

- (h) Section IV - Section IV will contain detail information on individual leases which are not all or part of a specific installation. Data included in this Section will be as shown on attachment 12. Location will include city and street address where applicable; otherwise, the county will be shown.

Data in Section IV will be reported by location within the three major geographics (United States, possessions, and foreign

countries). A total will be shown at the end of each state, each country, and each major geographic area showing the number of individual leases and the cost of the annual rental therefor. In addition a one-line entry will be shown for the leases included in Section III followed by a grand total line for each state, each country, and each major geographic area covering the leases in Sections III and IV of the Inventory Summary.

Attachments - 12
